

① Connect #'s in sequence

⑤ draw/NOTICE

3 DRAW/NOTICE

A grid of numbers from 1 to 50, arranged in a roughly circular pattern. The numbers are scattered across the page, with some appearing in the top-left quadrant, some in the top-right, and some in the bottom-left. The numbers are: 45, 21, 37, 33, 61, 65, 29, 5, 47, 77, 53, 57, 69, 25, 13, 73, 17, 49, 9, 67, 7, 23, 43, 27, 39, 79, 59, 37, 3, 35, 63, 12, 60, 16, 7, 55, 15, 75, 24, 64, 36, 11, 71, 51, 20, 72, 4, 52, 76, 79, 48, 20, 80, 28.

Step 1: Have participants find numbers 1-50 on the page.

Step 2: Say, "Let's make this a bit easier. Draw a vertical line down the middle of the page. Now, continue finding your numbers."

Step 3: Now, draw the horizontal line across the center of the page. How much easier is it to find the numbers?

Point: Sure we can find the numbers without the lines. However, when given the "accommodations" it's easier, without 'changing or reducing the task'.
